The Ontario Veterinary College offers a variety of services for equine patients through both the OVC’s Large Animal Hospital and Equine Sports Medicine & Reproduction Centre.

Our team of veterinary technicians and veterinarians including reproductive, internal medicine, surgical, diagnostic imaging and anesthesia specialists combined with the support of our graduate and undergraduate veterinary medicine students ensures we can create well supported, customized, comprehensive care plans that match the needs of individual animals and their owners.

**OVC’s team of experts offers clients well supported comprehensive care plans to match their needs**
