OVC Scholarship Competition Summer 2017

OVC Research Support Services is pleased to announce an additional scholarship competition during the summer semester 2017. The objective is to utilize the available stipends to attract newly interested students to enroll in OVC graduate programs and to engage in recently funded faculty research projects. Students who participated in the Winter 2017 OVC Scholarship Competition but who were unsuccessful may reapply to the OVC Summer 2017 competition.

Overview

OVC scholarships were created to enhance new graduate student enrolment and research productivity by recruiting high quality graduate students. The OVC scholarship program builds on, rather than replaces, existing funding sources for graduate training such as funds from research grants or external scholarship programs.

Value & Duration:

Masters - \$18,500 plus benefits per annum for 2 years

Doctoral - \$20,000 plus benefits per annum for 3 years

Eligibility: Canadian or permanent residents entering Masters or Doctoral studies in the summer or fall 2017 semesters. Applications from students transferring from one graduate program to another may be considered if the transfer contributes to a net increase in student enrolment (e.g., transfers from DVSc to PhD programs are not eligible).

Other Conditions: Students must remain registered full-time and maintain satisfactory progress for the duration of the scholarship in order to maintain funding. All recipients of OVC scholarships and fellowships are required to apply for external stipend support as stated in the terms and conditions which can be found in the **Program Description** on the [OVC Research website](#).

Tenability: For students who receive additional funding, either before or after receipt of an OVC scholarship, the OVC stipend will be adjusted by 50% of the amount of the lesser award as stated in the terms and conditions.

Deadline: The deadline for this competition is **June 9, 2017**. The online application will become accessible on **May 1, 2017**.

Please see the [OVC Research website](#) for more information.
